Experience

Rather Labs, Product Analytics Specialist

Remote
2023 – 2026
3 years

- Worked on the product analytics platform, designing and implementing ETL data pipelines and a fully responsive interactive dashboard (Plotly/Dash) to track KPIs, visualize key metrics, and enable advanced reporting.
- Conducted comprehensive data analysis across payment platforms (Stripe & MercadoPago) and the application database to identify payment failure patterns, understand user behavior, product usage, and monitor errors, enabling data-driven strategic decisions.
- Collaborated with project leaders to define strategic KPIs and advanced metrics to align business objectives, performance tracking, and executive reporting.
- Designed and implemented user reactivation workflows resulting in a 40% reactivation rate.

Anyone AI, Machine Learning Trainee (part-time)

Remote
Mar 2024 – Aug 2024
6 months

- Built predictive models using a dataset of 350,000 records to assess credit default risk for home loan applicants.
- Developed a computer vision system using Convolutional Neural Networks to classify vehicle brand and model from e-commerce images.
- Performed sentiment analysis on over 50,000 movie reviews applying Word2Vec and Logistic Regression techniques.

Scale AI, Quality Assurance (freelance)

Remote
Jan 2023 – Mar 2024
1 year 3 months

- Created domain-specific evaluation questions to train AI models and performed quality assessment of AI-generated responses.
- Used Python for testing, debugging, and improving code generated by large language models.

Education

Instituto Balseiro, Telecommunications Engineering (incomplete)

Bariloche, Argentina
2016 – 2018

- Successfully admitted through a highly competitive entrance exam to one of the most selective engineering programs in Latin America (approximately 10 students admitted per year). Completed the core foundational years with strong focus on advanced mathematics, statistics, probability, physics, programming and analytical thinking.

Certifications

Associate Data Engineer, DataCamp

June 2026

- Focused on data warehouse design, dimensional modeling, database architecture, and advanced SQL.

Google Data Analytics Professional Certificate, Coursera

Jan 2026

- Training in data cleaning, visualization, SQL, R, and business-focused data analysis.

Machine Learning I, Columbia+

Jan 2026

- Advanced course on core machine learning concepts and algorithms.

- Comprehensive program focused on production-ready machine learning systems.

Skills

Programming & Query Languages: Python, R, C, SQL, MQL (MongoDB Query Language)

Data Analysis/Visualization: Pandas, NumPy, Matplotlib, Seaborn, Dash, Plotly

Databases & Cloud Data Warehouses: PostgreSQL, MySQL, DuckDB, MongoDB, BigQuery

Machine Learning: Scikit-learn, PyTorch, TensorFlow

Data Engineering: Airbyte, dlt, dbt, Airflow, Prefect, ETL/ELT Pipelines, Docker

Version Control: Git/GitHub

Languages

- Spanish (native)
- English (fluent)
- Portuguese (intermediate)
